Keen to learn how to use water more efficiently? We've created a range of free services and tools to help you save money, protect the environment, and avoid unexpected charges.

Free services to help you get started...

Water Efficiency Visit

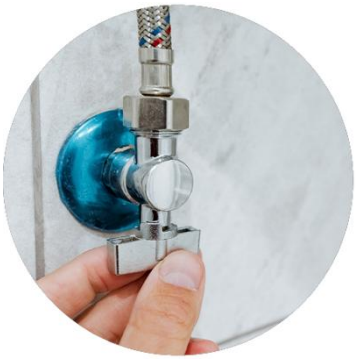
Are you a small, medium, or community business? We'll visit your site and carry out a free water efficiency assessment which includes the installation of free water-saving products, and advice tailored to your business needs helping you to reduce water usage and lower bills. Complete this form and a member of our team will be in touch to arrange your appointment.

Free water-saving products

We offer a range of water-saving devices, including:

- Urinal Timers - Tap Aerators
- Leak Detection Strips - Free pipe lagging/tap jackets

If you think your business could benefit, click below to request a visit.



Self-Assessment Guide

Prefer to take control yourself? Click here to download our free self-assessment guide to help you spot opportunities to save water and money across your premises.

Click below to visit our Get Water Fit page and order your free water saving devices.

Get water fit

Make water efficiency part of your culture

While many employees will already use water saving tips at home, they may not know how to replicate this within the workplace.

Introduce water saving information, an employee suggestions scheme or arrange a water efficiency session to increase awareness of the importance of using water wisely. We even have some water saving posters that you can print and display around your building.

Click here for our water saving posters

Thank you,

Team Welsh Water
